LIMITED TIME OFFER - ORDER TODAY FOR YOUR COPY OF CD

EQMS has years of experience in environment, safety and loss prevention / control. We know how to minimize your compliance liabilities and strengthen EHS performance including work place management.

## Are you AWARE ???

- Under EMS ISO-14001 / OHSAS-18001, sometimes companies do develop these documents / registers, however in a significantly deficient manner and accordingly may not perform adequately in terms of EHS legal compliance due to the absence of very framework.
- For examples, Identification of Hazardous Chemicals, Hazardous Wastes, Dangerous Operations, Dangerous Occurrences, Master list of Pressure Plants, Hearing Conservation Programs, Health Surveillance requirements, License requirement for Gas Cylinder Storage, Master list of licenses, statutory responsibility and many more GAPS.

## FACE IT

You as **FACTORY MANAGER** obviously need to ensure compliance with comprehensive and complex EHS Legislation. However, a more daunting task you face is to summarize all these EHS legislation in user-friendly / compliance checklist Format in an auditable manner. Do you have time and resources to develop such a EHS legislation compliance Register with beginning from scratch? And may be you don't even know exactly where to start?

Here comes the above EQMS unique tool to effectively help you in saving your time and precious resources in developing the electronic Register of applicable EHS legislation. Refer [Annexure for Coverage](#).

This electronic Register is in Microsoft Word making it so easy to customize to your site in few hours with your company name and site specifics. You could also seek EQMS help for this through One day familiarization / customization training to your regulatory personnel.

This Register makes you get rid from your ongoing WORRIES.

- How do we start from scratch in developing this Register?
- Do you have the staff or financial resources to write the such Register for you?
- How do I systematize my identification of applicable EHS legislation and their key requirements so that everybody read it and understand it?
- How do I reduce the paper work and at the same time make all departments aware with their roles and responsibilities and rights under EHS legislation?
- How do I develop a framework and simple compliance checklist to ensure compliance and face regulatory personnel visits?
- Can this information in an user-friendly "**TEMPLATE FORMAT**" so that I can continually update it with minimal changes?
